LL PRO POINT is a LED based accent luminaire. The stylish design housing is similar to the standard MR16 luminaire. The luminaire contains highpower OneChip RGBW LEDs with accurate and uniform light distribution. LL PRO POINT provides dynamic colour changes of full colour spectrum with continuously variable intensity.

LL PRO POINT use only with LL PRO SPLITTER RGBW! For intensity and colour control it is necessary to connect to LL PRO DRIVER and LL PRO SPLITTER.

Applications

- Accent lighting
- Decorative spotlighting
- Rental business

Connection conditions - LL PRO SPLITTER:

- Each SPLITTER Out to luminaire must be connected to LL PRO POINT
- Maximum allowed current on SPLITTER Out is 4x0,35A at max. 30V DC
- Never use more luminaires than the maximum current allows
- LL PRO SPLITTER is calculated only for LL PRO POINT luminaires

LL PRO GRAPHIC PANEL is a special designed diffuse graphic LED panel ideal for creative lighting design and animation. The luminaire is characterised by high brightness, rectangular light distribution, RGB additive colour mixing, especially deep colours and continuously variable intensity 0 - 100%. By lighting control is possible to generate innumerable lighting scenes and effects and intersect them each other. The combination of more luminaires enable creation of graphic spaces and elements, generating the dominant and great scenes point. This range is compatible with DMX512 for any lighting and graphic effects.

LL PRO DRIVER's are 4/8/12/36 channels LED driving systems which provide the ultimate configuration flexibility and variable connection abilities. The drivers are designed for free operation in entertainment and architectural applications and building integration systems. Each channel has full 16 bit PWM dimming technology for optimal LED driving curve ideal for unique LED colour mixing.

LL PRO DRIVER's enables easy and fast fix installation of all LL LED DC24V luminaires without additional convertor.
